The screenshot shows the homepage of the journal *Applied Energy*. The header features the journal's logo, the text "Applied Energy Supports open access", and navigation links: "Submit your article", "Guide for Authors", and "Open Access options". A search bar is located on the right. Below the header, there are several sections: "Articles & Issues" (with a dropdown menu), "About" (with a dropdown menu), and "Publish" (with a dropdown menu). The "About" dropdown menu is open, showing options like "Aims and scope", "Editorial board", and "Abstracting & indexing". The "Articles & Issues" dropdown menu is also open, showing options like "Latest issue", "All issues", "Articles in press", "Article collections", "Mendeley datasets", "Set up journal alerts", and "RSS". The "Publish" dropdown menu is open, showing options like "Submit your article" and "Guide for authors". The "Articles" section is visible, with sub-sections: "Articles in press", "Latest published", "Top cited", and "Most downloaded". The "Latest published" section shows three articles: "Exploring the role of forest biomass in abating fossil CO₂ emissions in the iron and steel industry – The case of Sweden", "A comprehensive review on sub-zero temperature cold thermal energy storage materials, technologies, and applications:", and "Enabling low-voltage, peer-to-peer, quasi-real-time electricity markets through consortium blockchains".

About the journal
Applied Energy provides a forum for information on the development and demonstration in the areas of energy conversion and conservation, the optimization of energy systems, and the integration of energy systems with other systems.

About the book

电子书简介

Description

Applications of Artificial Intelligence techniques in the Petroleum Industry gives engineers a critical resource to help them understand the machine learning that will solve specific engineering challenges. The reference begins with fundamentals, covering preprocessing of data, types of intelligent models, and training and optimization algorithms. The book moves on to methodically address artificial intelligence technology and applications by the upstream sector, covering exploration, drilling, reservoir and production engineering. Final sections cover current gaps and future challenges.

teaches how to apply machine learning algorithms that work best in exploration, drilling, reservoir or production engineering

- Helps readers increase their existing knowledge on intelligent data modeling, machine learning and artificial intelligence, with foundational chapters covering the preprocessing of data and training on algorithms
- Provides tactics on how to cover complex projects such as shale gas, tight oils, and other types of unconventional reservoirs with more advanced model input

Game theory and fisheries

Lone Grønbaek ^a, Marko Lindroos ^b, Gordon Munro ^c, Pedro Pintassilgo ^d [Show more](#)<https://doi.org/10.1016/j.fishres.2017.11.027>[Get rights and content](#)

Abstract

Game theory studies the strategic interactions between and among decision makers, players, through mathematical models called games. This paper presents an overview on the evolution of the application of game theory to fisheries economics. The first applications emerged in the late 1970s.

How do I use the new advanced search?

Last updated on 24/07/2018 01:46 PM

Performing an advanced search tutorial

The new advanced search form offers an open design which allows you to specify one or more pieces of information (e.g., keywords, authors, dates, etc.) to find related documents in ScienceDirect. You can easily build an explicit query using multiple Boolean operators and nested clauses in your search.

None of the available fields are mandatory to an advanced search query. You are simply required to complete at least one field with searchable information.
